Centre for Object Technology

*Centre for  
Object Technology*

Revision history: 1.0

Author(s): Kåre Kjelstrøm & Peter Petersen

Status: Finished

Publication:

Summary:

Following a thorough definition of component models in general, the document presents and compares the Microsoft Component Object Model (COM) to the defined criteria. An evaluation of the COM design facilities in various Integrated Development Environments then leads to the definition of a general tool for COM development, concluding the paper.
